# You the World Citizen

Experience the world as home.

# You the World Citizen

All students from the second grade (13/14 years old) organize an event to stimulate international exchange with a foreign school.

All participating students become more aware of worldcitizenship and develop a social entrepreneurial attitude by learning from each other.

*The entreprenasium students go on excursion to the foreign school/ project to get ideas how to stimulate exchange. By doing so they fulfill parts of the entreprenasium program.*

*Value student: I can create and organize my own event. I can empathize with other people/ habits and cultures.*

*Value school: We create an open environment for the students to exchange with people / habits and cultures worldwide by giving them the opportunity to create an event. As a school we stimulate social entrepreneurial learning by doing this.*

*Value society: Nice and interesting events are organized by students in collaboration with several social partners.*

*Value project: Students worldwide are introduced to the concept of the entreprenasium and are inspired by social entrepreneurial learning.*

## EXAMPLE

**Eventday:** The students show which events they are going to organize.

**Slowdate:** The students present there plans to event organizers or students who follow an event related study, and gain feedback.

**Mediaday:** The students learn how to use and deal with media like radio, television and other press and social media. How can these media be reached and how can they achieve publication?

**Movienight:** The students show their selfmade film about the project to the public.
